Dear Dr. Stock;

I am worried about not receiving any reports on the tests. I thought about the way the Lab. had been preparing the material for the tests, and why they were not getting better results. So I read over their preparation and found that they were only using the leaves & stems leaving out, the roots, which are very essential in the "Essias" for treatments. You see three years I worked on finding the herbs necessary to obtaining the best results. I wrote to you asking if I should send the complete powdered material. There is no reason why they could not get the same results I did?

I hate to bother you with stock
 but I am so anxious that
 they get better results than
 they are getting, if I can help
 in any way I am anxious
 to do so.

I would appreciate hearing
 from you at your convenience

Sincerely

— yours truly

Rene M. Laisse

Dr. J. J. Taylor
